

saf-Tglo[®] SSUL-X36

Next Generation Emergency Exit Marking System

Want to upgrade your tired old yellow floor path marking, but don't want the hassle of changing carpets or tricky installs? Then we have the solution. Our latest generation saf-Tglo[®] has all the performance excellence you'd expect from us, plus it has a faster cut and seal process for easier installation, is available in an extensive CMF palette, has a wide range of customisation options and is available in our patented blue glow. Enabling you to complement your cabin design without carpet or LOPA drawings changes.

saf-Tglo[®]
SSUL-X36

Full CMF palette compatibility

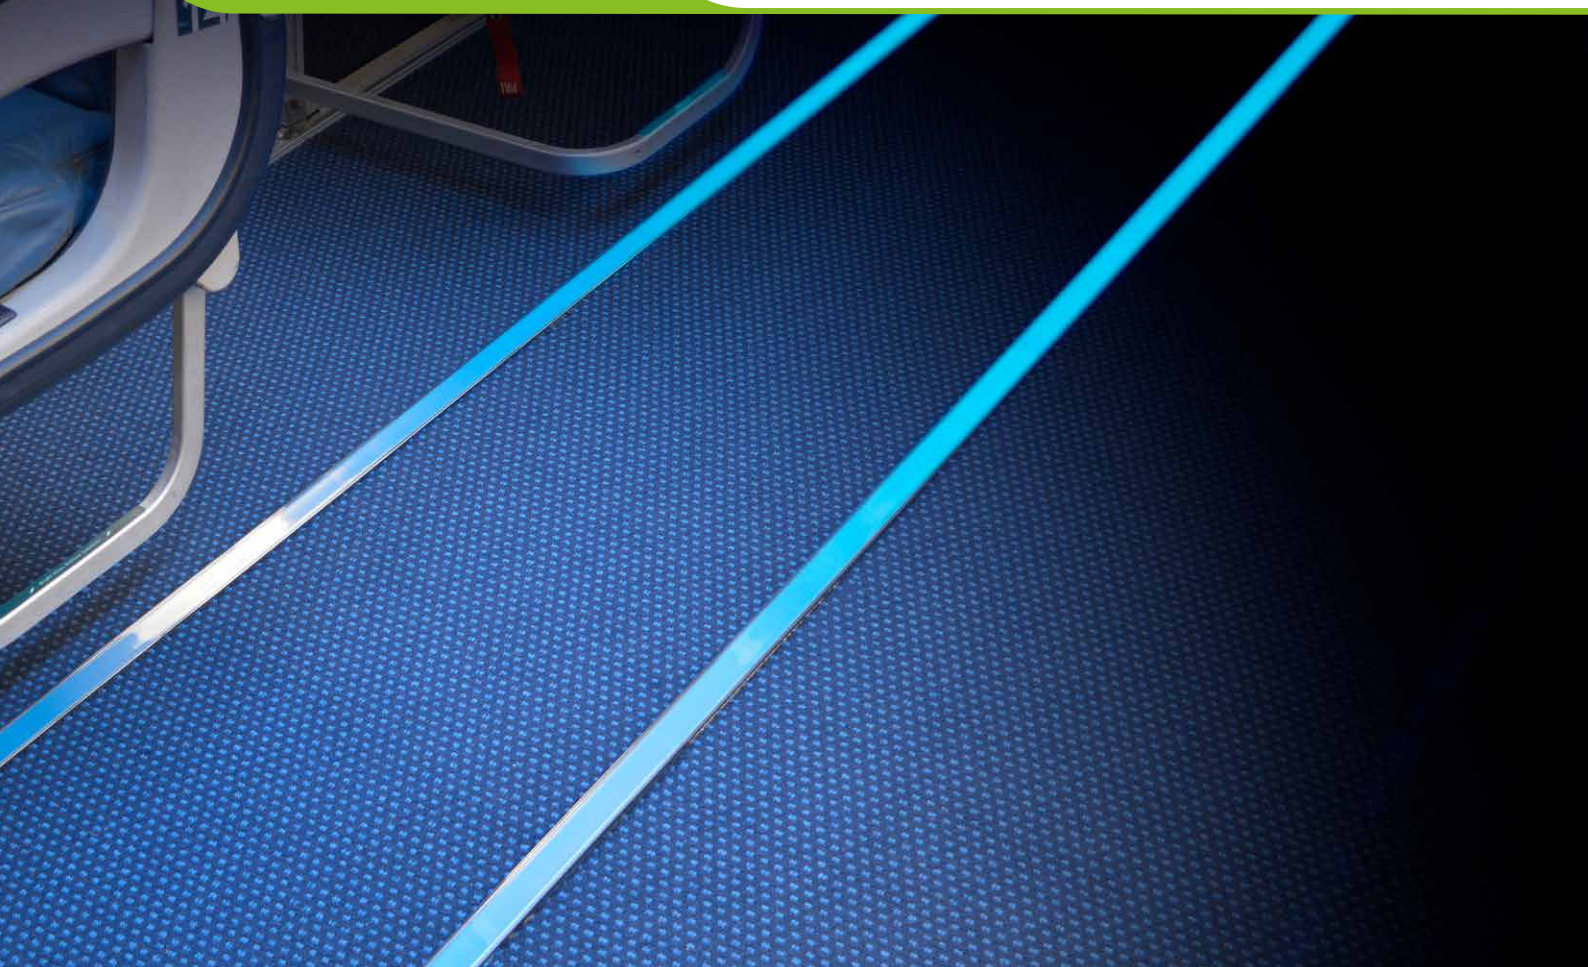

Single multi model STC

Cut, Seal, Stick, Easy Install

Unlimited Life

Bright ideas.
Brilliant solutions.

saf-Tglo® SSUL-X36 Comparison with Previous Generations

We are one of the world's leading manufacturers of aircraft cabin lighting. We also designed the first saf-Tglo® photoluminescent emergency exit marking system for aircraft in 1995. Building on that heritage and expertise, we continue to develop and refine our saf-Tglo® system. The latest generation, SSUL-X, maintains all our existing performance excellence you know and love and also incorporates more colours, finishes, is available in blue glow and is easier to install. So SSUL-X has the best aesthetics to date, without losing any of the durability or air worthiness of previous generations.

Here is a simple comparison of SSUL-X to earlier generations of saf-Tglo®

saf-Tglo® 36mm Legacy

- One piece design
- Green glowing
- One hour install (Typical Single Aisle)
- Unlimited lifespan, dependent on test coupon

saf-Tglo® SSUL-X36

Legacy benefits plus:

- Edge-to-edge colour
- Patented blue glow
- No carpet changes
- Matt & gloss available

Features & Benefits of SSUL-X36 per user category

Specifier
